EDUCATION

JAN 2025 - DEC 2028 (EXPECTED) | UNIVERSIDADE ESTÁCIO DE SÁ
Bachelor's in Software Engineering

APR 2026 - SEP 2026 | PUC-RIO
Artificial Intelligence and Data Science in the Cloud: AWS in Practice

- Trained, evaluated and deployed classification, regression and time-series models in Amazon SageMaker, exposing them through APIs.
- Analyzed data with Python, Pandas and NumPy from Amazon S3; used EC2, RDS and DynamoDB with access control, monitoring and cost-management practices.

APR 2026 - PRESENT | SANTANDER OPEN ACADEMY AND AWS
SANTANDER JORNADA TECH AWS

OCT 2026 - PRESENT | DIO · ITAÚ
Java, Spring Boot & AI Bootcamp

IN PROGRESS | KUMON
English — Level M

EXPERIENCE

JUN 2026 - OCT 2026 | BTG PACTUAL

Software Engineering Intern (Short Job) | IT Onboarding & AI

Developed an AI assistant from scratch, end to end, to help banking onboarding operators consult business rules, documentation and data. The application went live and the team began using it.

- Built a knowledge base with hundreds of documents, organizing business rules, workflows and technical information for use by the assistant.
- Developed the Python/FastAPI backend and React/TypeScript frontend, including chat, conversation history, feedback and administrative dashboards.
- Implemented intelligent document search with RAG and natural-language queries to PostgreSQL and MySQL, with source references and read-only data access.
- Developed conversational context management, question classification and feedback-based knowledge review, plus authentication, access controls and data protection.
- Prepared application delivery with Docker, Kubernetes and Azure DevOps; implemented Datadog observability and AI usage and cost controls.
- Built automated tests and AI response evaluations to assess quality, identify defects after changes and support further development.

JAN 2026 - FEB 2026 | BTG PACTUAL

Software Engineering Intern (Summer Job) | IT Asset Management & Funds

Worked on a Manhattan real estate analysis project to support investment decisions:

- Integrated data from two systems, resolved inconsistencies and matched properties across sources using information such as price and floor area.
- Developed business rules and a scoring system to flag opportunities, price changes, properties listed in multiple sources and status changes.
- Contributed to a dashboard with filters, maps and price-per-square-foot comparisons for regional property analysis.
- Used Python, SQL, Apache Spark, Pandas, Databricks, AWS and RabbitMQ in a Scrum-based project.

JAN-AUG 2024 | FLUXO CONSULTORIA - UFRJ JUNIOR ENTERPRISE

Project Consultant

- In the Technology Coordination team, developed a management application in Node.js and TypeScript, from requirements gathering to delivery.
- Supported accounts payable and bank reconciliation in the Administration and Finance department.
- Visited a food factory and interviewed employees to gather requirements and map processes; helped redesign its data model and the new system's data flow.
- Conducted interviews and group exercises during recruiting and mentored new trainees.

SKILLS

- **Languages:** Python · TypeScript · JavaScript · SQL · Java (learning) · HTML5 · CSS3
- **Backend:** FastAPI · Node.js · REST APIs · SQLAlchemy · Alembic · Spring Boot and Spring Data (learning)
- **Frontend**: React · TanStack Query · Zustand · Vite
- **Data**: PostgreSQL · MySQL · Pandas · NumPy · Apache Spark · Databricks · Power BI · Excel
- **Applied AI:** LLMs · RAG · Text-to-SQL · scikit-learn · LightGBM · Amazon SageMaker · Amazon Bedrock
- **Cloud & DevOps:** AWS (S3, EC2, RDS, Secrets Manager, ECR) · Docker · Kubernetes · Azure DevOps/Pipelines · Git/GitHub · RabbitMQ · Datadog
- **Quality:** pytest · Hypothesis · Vitest · Playwright · automated testing

LANGUAGES

- **Portuguese:** native
- **English**: intermediate
- **Spanish**: basic
